

A15-34

**Introduced in 2004 in the UK by Redeva
Available to Summerfruit Company growers**

Patented variety - Propagation prohibited - Bred by CIV

Plant: medium vigour; upright growth form. The foliage shows a deep green colour, never chlorotic. Blossom is very abundant and of long duration, with erected flowers. Good productivity.

Flower: above the foliage, with a large corolla, rich in pollen.

Blossoming season: medium (=Elsanta).

Fruit:

Large, very regular conical shaped. Very firm.

Brix: 9.0

Skin colour: glossy scarlet/red

Flesh colour: red

Taste: juicy, perfumed taste

Harvest: medium (=Elsanta).

Overall assessment: A15-34 is productive with a good and constant size. This Cultivar has proved to be suitable for different growing techniques and it can grant a second summer yield. Waiting bed and A+ plants are suitable for out of season productions(Autumn production and hydroponic culture).

Excellent results have been obtained with misted tips planted end July-early August.

PLANTTYPES

Plant type	Use
Tray plant	60 day crops, glasshouse, tunnels
Waiting bed	60 day crops
Misted tips	Field production
Frigoplant grade A	60 day + 2 yr cropping
Frigoplant grade A+	60 day, glasshouse, tunnel, 2 yr cropping
Frigoplant grade AA+	60 day, glasshouse, tunnel, 2 yr cropping
Tips	Production of misted tips or tray plants

Deadlines for ordering plants:

Tips: latest end May for delivery from end June on.

Misted tips: latest half June for delivery end July/early August

Tray plants: latest half June for delivery from December on.

Waiting beds: latest half June for delivery from December on.

A, A+, AA+: latest November for delivery from December til August.
